

Professor RONG, Pei-Jing

Dr. Rong Peijing is a professor and an academic leader of acupuncture in China Academy of Chinese Medical Sciences (CACMS). Her research interests are involved in mechanisms underlying acupuncture and the therapeutic effects of acupuncture. She has made series studies of transcutaneous vagus nerve stimulation on depression, epilepsy, diabetes, insomnia, and the invention of acupuncture instruments. The research team investigated that the mechanism of auricular acupuncture is the correlation between auricular and the vagus nerve. Currently she is the Associate Director of the Committee of Auricular Acupuncture and the secretary general of the Academic Committee of China Association of Acupuncture and Moxibustion (CAAM). She's got the financial supports from the International Association on the study of Pain (IASP), the International Union of Physiological Sciences (IUPS) and the International Brain Research Organization (IBRO). She was awarded the Distinguished Young Investigator by the Federation of the Asian and Oceania Physiological Societies (FAOPS). She's served more than 20 international conferences as a chair/pc member and offered about 10 keynotes/talks in high ranking conferences or universities, and has also served as editor/guest editor in about 10 peer reviewed journals in professional science. So far, she has published more than 100 academic papers, including *Biological Psychiatry*, *PLoS One*, et al. SCI journals. She has won 6 Scientific Awards of the Provincial and Ministerial-level.
